DETAILED ACTION

1. Claims 1-21 have been examined.

Response to Arguments

Any rejection not repeated has been withdrawn.

Applicant's arguments filed 8/24/2007 have been fully considered but they are not persuasive. Applicant argues the users modify the information without any regard to any record management procedures of an organization; however, applicant provides no explanation as to how this differs from the organization guiding a user through there preprogrammed "process of modifying the information". (8/24/2007 argument 8-9). Thus, the applicant's argument is not persuasive. Furthermore, Gardos discloses the selections of data in the profile to be modified calling functions and procedures from the organizations database servers, thus this generates a local instance of the procedure of the organization and therefore the profile is instantiating digital records management procedures of the organization using the broadest reasonable interpretation.
